Work Experience

Freelance Software Developer, Komodo Group IT Professionals, Amsterdam

July 2018 — January 2022

Working on projects for several clients and inhouse development.

Deloitte Tax & Legal accountancy, Amsterdam

Multinational professional services network with offices in over 150 countries, one of the 'Big Four' accounting organizations. I was responsible to maintain and further develop the C# solutions within the Moonlit.AI project. Moonlit is an online legal research platform powered by artificial intelligence. Their main goal is to create a groundbreaking search engine based on AI Language Models, that can be used to search jurisprudence worldwide. Worked fully remote, SCRUM, Azure VM(bastion). On a side project: ETP (Enterprise TAX Platform) I developed and integrated a .NET Core client library to connect to their CIAM-API (Client User Identity and Access Management), which is used to manage external users in their AAD. (Azure Active Directory)

CaptureTech, Nieuw-Vennep

Police tender. A distributed management system (cloud and local cabinet) for electronic cabinets, where items such as bodycam, laptops, pepper spray, baton etc.. can be stored. The challenge was mainly in the connection and synchronization between the local systems and the cloud database with SignalR. My contribution was Fullstack: worked on both the REST API and UI projects.

QizMe, Amsterdam

Continuation of the QizMe dating platform. This time more focus on front end tasks: development of the React Native app. Further development of the WEB-API. Social media login. Storage and management of graphical content. Think along with the business regarding the flow of the application. Maintenance of the website. Added the gaming-mode to the app and the WEB-API.

Fontem Ventures, Amsterdam Schiphol

Worked on the Checkout Gateway, backend developer of the Checkout team. Part of the new e-commerce web-portal built to sell Vaporizers and E-cigarettes. Velocity, Datadog, Loqate, Kafka, Rider, Functional Programming with C#. Mobile first development.C# Backend Web API.

Allshare, Amsterdam, Sloterdijk

Working on eBankView. Doing maintenance on module CAM: Corporate-Actions-Module. Building the new TAX-module. (taxes) eBankView is the web based banking application for VanLanschot Bankers, build in C# Microsoft .NET Core.

About: Blank, Zaandam

Doing maintenance on the New York Pizza website and back office systems. C# .Net, MVC. Retrieving data from the VektisStream API for the Solvo.nl project.

Worked with: **C#**, **.NET Core**, ASP.NET, MVC, EntityFramework, **SQL server**, **REST API**, JSON, Swagger, Postman, MediatR, SignalR, Elasticsearch(NEST), HTML (5), CSS, Javascript, Vue.js, Vuex, React.js, ReactNative, Angular(7), **Azure DevOps**, (GIT/SourceTree), Azure CI/CD pipelines, Docker, AAD(Azure), Azure Functions, Keyvault, GIT, Teamcity, Jira, RabbitMQ, XSLT, UnitTests, UnitTesting(Moq), **Scrum**, LLBLGEN, PostgreSQL

Freelance Software Developer, KPMG, Amstelveen

September 2016 — April 2018

Doing maintenance on many different .NET applications for a large international accountancy organization. Project: ACO = Automated Close-out. I built and delivered ACO 2.0 in 2017 and ACO 3.0 in 2018.

Worked with: C#, .NET, SQL Server, Javascript, CSS, Azure Devops, SCRUM, Angular, ASP.NET, IIS, MSI, WCF, XML

Freelance Software Developer, Expereo, Amsterdam

August 2016 — August 2016

Working on BOSS version 5. BOSS is a platform developed in .NET that ties together all the nodes from ISP's all over the world.

Worked with: C#, .NET, SQL Server, Teamcity, SCRUM

Freelance Software Developer, Lobster, Amsterdam

February 2016 — May 2016

Back-end based on EF. Started code-first, then switched to database-first. Visual studio 2015 using resharper. MSSQL server 2014. Web-API using GraphQL (facebook). Frontend: Angular 2. Node.js using NPM as a frontend package manager. Web application is hosted in Azure, also using CDN for streaming video-content globally.

Worked with: C#, .NET CORE, SQL Server, HTML (5), Javascript, Typescript, CSS, AzureDevops, Teamcity, SCRUM, Angular

Software Developer, Reed Business (hired as consultant: Working Spirit), Amsterdam

February 2014 — November 2014

Working as Dev-ops @ ReedBusiness. Programming C# .NET. Nextens , Cumulus. Refactoring the Nextens solution. I had the pleasure to work with a professional team. Scrum master: Daan Fliervoet. Senior developer: Hanno Zwikstra. And one of the best guys I ever worked with: Bryan Sumter.

Worked with: C#, NET Core, SQL server, HTML, Javascript, CSS, Azure DevOps, SCRUM, Angular

Software Developer, Working Spirit ICT, Amsterdam

November 2013 — February 2016

Inhouse: Developing software with Microsoft .NET technology. Mobile development with Sencha: HTML5, Javascript, CSS. Working as a consultant, I worked on several projects for several clients.

Worked with: C#, .NET, SQL Server, HTML, Javascript, CSS, Azure Devops, SCRUM.

Freelance Software Developer, Truvo, Amsterdam

February 2013 — September 2013

Creating WCF services as a C# back-end developer in a service oriented architecture.

Worked with: C#, .NET, SQL Server, Javascript, CSS, WCF, XML

Software Developer, ExpertVision, Haarlem

February 2011 — January 2013

Software developer working on our clients (tour operators) websites and our connected back office : DynaTravel.

Worked with: C#, .NET, SQL Server, HTML, Javascript, CSS, Azure Devops, ASP.NET

Software Developer, Sogeti Nederland, Vianen, Diemen

July 2008 — January 2011

Was working as a consultant with Sogeti. Worked on many projects for many clients.

Worked with: C#, .NET, SQL Server, HTML, Javascript, CSS, TFS, SCRUM
